Professional Summary

Microsoft SharePoint Architect and Microsoft Power Platform Consultant with 12+ years of enterprise experience designing, governing, and delivering SharePoint Online, on-premises SharePoint and Power Platform solutions for global organizations.

Proven expertise in SharePoint architecture, governance, document management systems (DMS), migrations, automation, and integrations. Strong background in defining standards, policies, and scalable architectures, leading modernization initiatives, and enabling digital transformation through low-code/no-code solutions.

Microsoft Certified Power Platform professional with hands-on leadership in architecture design, stakeholder engagement, and technical governance.

- Over 12 years of SharePoint experience (Online & On-Prem)
- 4+ years as a SharePoint Architect
- 2 + years' experience in Power Platform
- Proven expertise in migrations, governance, automation, and customization
- Strong skills in Azure, PowerShell and SQL Server

Core Competencies

SharePoint Architecture & Governance

- Enterprise SharePoint architecture (Online & On-Prem)
- Information architecture (Hub sites, site collections, metadata)
- Governance frameworks, standards, and policies
- Security model, permissions, compliance & lifecycle management
- Document Management System (DMS) design
